AARON MCFARLIN

FULL STACK DEVELOPER

ABOUT ME

IAs a Full Stack Developer I enjoy being part of every aspect of the development process. From making the sure there is a great UI, to figuring out how to best organize my database, there is no task I wont do. I have the techincal and interprsonal skills to be a great addition to any team.

SKILLS

CSS
comfortable with modern css3 programming

HTML
Good understanding modern HTML5 tags and mobile responsiveness

JAVASCRIPT
Comfortable using restful APIs and various javascript frameworks

Node.js
Familiar with server creation and deployment, as well as database creation. Primarily using express framework.

Mongodb
I understand how to build and query databases

React
Good understanding of how the framework operates

EXPERIENCE

Facebook Messenger Bot

A Facebook messenger bot built using Googles dialogflow AI. This bots main purspose is to help me build my freelance business. It currently has the to set a appointment and take messages, with more features to be added. Website: influentialdesigncompany.com

Currency Fighter

this a full stack MERN app. The plan is to continue to build this out and have it eventually trade money.

EDUCATION

Howard University
2009 - 2012
